Integrum Set of profound research tools

Integrum's search engine ARTEFACT developed by leading Russian scientists creates a drastically new type of information space. It is more effective than any typical Internet-search due to unique modules of morphological search. **You never miss any results** because of misspelling or using a single word-form. ARTEFACT is supplied with many predefined searches that make a great number of typical requests a simple task. It does not matter whether you look for all articles about a certain company or conduct a carrier research of a public figure. Just choose the type of your request and name the subject - **ARTEFACT performs all the routine search tasks in one click.**

Integrum's potential is limited only by clients' expertise. It is easy to find any relevant information and **it is easy to conduct a profound analysis of all data obtained.**
