SCIENTIFIC ELECTRONIC LIBRARY eLIBRARY.RU is the outstanding Russian information resource in the sphere of science, technologies, medicine, education, humanities. The full-text database contains academic journals from the leading Russian publishers, including 107 journals from the publishing house "Nauka".

The main features of the information product:

At the beginning of 2011, eLIBRARY.RU consists of more than 2000 academic journals:

- More than 1000 journals are available by subscription
- About 1000 journals are available in open access for all registered users
- 12-15 new titles are added every month.

Scope of the database

Academic journals at eLIBRARY.RU cover all fields and disciplines of modern science: from astronomy to nuclear physics, from anatomy to cytology, from automation to power-engineering, from anthropology to economics. Specially for Slavic Studies Centers there is a subject collection "Literature and Linguistics" which includes 33 journals from the authoritative Russian publishers.

Database content

80% of journals at eLIBRARY.RU platform are peer-reviewed journals.

High quality of the journals

Issues for the year 2011 and archives for the recent 3-5 years are available.

Recent editions and archives are available

All the information search functions have been implemented in the system; including index links, subject-thematic catalogue and complex bibliographic queries. Users have personal profiles to work with the found documents at their disposal.

Advanced Interface

Any university, library, consortium or individual researcher can subscribe to the information resource eLIBRARY.RU. Access is IP-authenticated. Number of users within IP range is unlimited.

Subscription is attractive and affordable for all institutions:

You retain access to the already-paid content within 10 years after subscription expiration even if you deny the following subscription to the journal current issues.

You are welcome to choose and obtain any academic titles that you wish. It isn't obligatory to subscribe to the whole database. Subscription is your own choice.

You may subscribe at any time of the year. Within the year you are welcome to arrange subscription to additional journals.

You get the access to the full usage statistic report of your institution. The statistics update period is once a month.

All categories of clients receive discounts and bonuses.

Most Russian academic publishing houses are committed to the principle of scientific collectivism – results of the research should be open to the professional community. Scientific Electronic Library fully endorses and supports the initiative of publishers. As a result, about 1000 Russian academic journals, presented in eLIBRARY.RU, are in open access for all registered users. Notably, the journal availability in open access does not mean that it's the "second-rate" edition. Flip through these titles and appreciate their content.
